

### Problems

Report of rash illness with fever (R/O Measles).

### Action

1. Obtain name, DOB, address and telephone number of person with rash illness.
2. Complete Measles Case Report Form.
3. If meets minimum criteria, give isolation instructions; explain need to call ahead, or take adult to enter Health Care Facility to notify staff that person with possible measles needs to be seen.
4. If child, obtain name of school, child care center, determine last day attended.
5. Forward Measles Investigation Worksheet to Disease Control as soon as possible next working day.
6. If Measles confirmed, and susceptible contacts identified, advise to seek medical care with appropriate isolation precautions. (IG given within 6 days or MMR given within 72 hours can be protective.)
